STEM Teacher

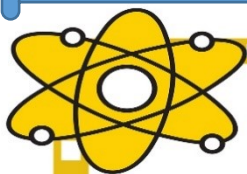

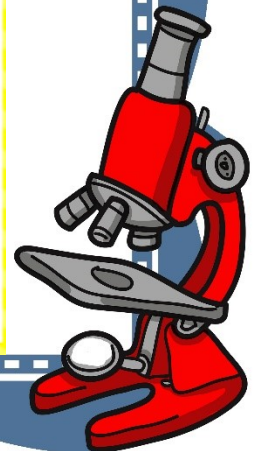

S
T
E
M

S is for **science**. It is for everything in the natural world.

T is for **technology**. It is anything humans have created to make life better.

E is for **engineering**. It is when people use the understanding of science and math to solve problems in the real world.

M is for **mathematics**. It is the study of numbers to solve real life problems.

Hi Parents!

I am the new STEM (Science, Technology, Engineering & Mathematics) Teacher at Leeway School! I have LOVED getting to know your child(ren) the first few weeks of school. My job is to create fun and engaging lessons that get your child(ren) thinking critically and problem solving throughout our session together. I see the Full Day classes twice a week and the Half Day classes once a week. On our Leeway Preschool 123 channel on YouTube, you can see the videos that I use with my lessons. I am looking forward to a STEMtastic year!

Love, Miss Athena ☺
