

The children made ornaments to hang up in their houses during the holiday season. We read holiday themed stories. The children used foam shapes, sequins, glitter and paint to paint the ornament of their choice!

We matched Gingerbread Cookie shapes!

After talking about why a gingerbread cookie shouldn't go in the water, we did our own experiment. We took Oreos and dipped them in milk! We let one soak in the milk for a few minutes and observed the changes! The cookie fell apart and got mushy from the milk. It was still delicious and we enjoyed eating them!

After listening to the story of the Gingerbread Man, the children were given a STEM Challenge! They were to use blocks, magnetic tiles and "rivers" to build a bridge to help save the Gingerbread Man from the sly fox.

Due to COVID restrictions, our holiday sing a long had to be virtual!! Fortunately, Miss Margie brought her guitar and Miss. Athena dressed up like Olaf. We put on a fun concert and the children enjoyed singing along! We even got a visit from SANTAAAAA!

The children at Leeway enjoyed building and playing in the Gingerbread House!
