

For our weeks on Easter, the children went on an Easter egg hunt!! Luckily the weather was nice for some classes and we got to go outside!! STEM has been able to use the small playground for our lessons!

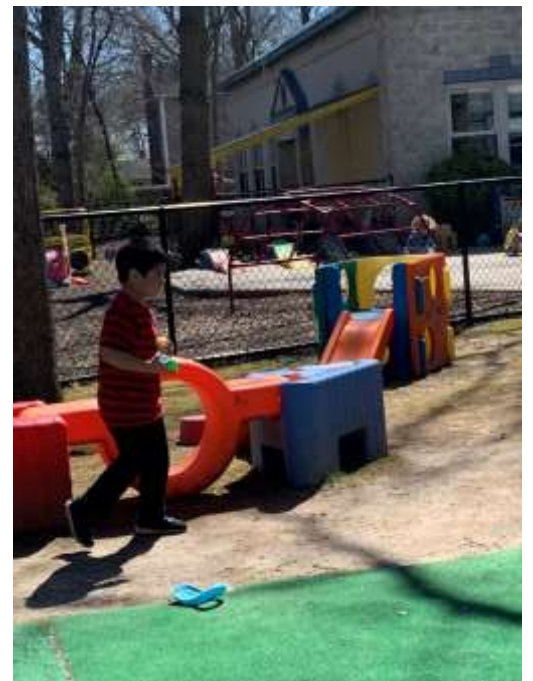

After our egg hunt, the children played with magnets and sorted the eggs. They had to figure out which ones had magnets in them. We also matched shapes, numbers and letters on egg halves and put them in a carton!

Egg Hunt

In Miss. Kayla's class, we watched Miss Margie on our Leeway Preschool 123 YouTube channel. (Check it out at home!!) Then, we reenacted Jack & Jill with some cube chairs!

In Miss Kris' class, they dyed white carnations different colors by placing them in colored water! Also, they made green houses and grew seeds!

Miss. Eileen's class enjoyed the small playground and counted to 20!

Miss Joanie's class enjoyed the Nature Trail and observed the early signs of spring!

SAVE THE WORLD  
TOGETHER

During Earth Day, the children used markers and water to make a coffee filter Earth! We used our felt board to create our solar system. We also used our Orboot globe and learned about the animals in the world!

Cornell Cooperative dropped off their Seashore Safari and let us do all of the exploring!! Crabs, clams, mussels and even a horseshoe crab came to Leeway!!!
