

During snow week, we talked about snowmen and played with snow (shredded paper). The children in Miss. Kris' class (pictured below) made the classroom a winter wonderland! They made snow angels and had a blast! Cleaning it up, not so much fun! 😊

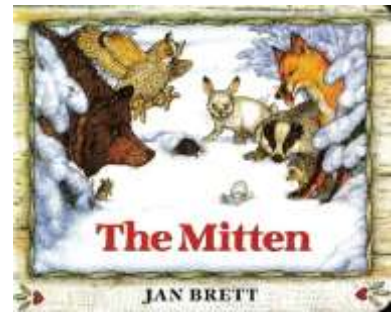

Miss. Athena won the Hess Toy Truck STEM Giveaway! We were so excited to play with the cars and experiment. The children built walls and buildings to see if the truck could knock them down.

After reading The Mitten by Jan Brett, we hung mittens on a clothesline and put them in numerical order. The children enjoyed playing in fake snow and finding the missing mitten shapes. We counted snowflakes and colored the corresponding numbered mitten. In addition, we used a snowman cut outs to identify shapes.

# National Bubble Wrap Day!

In January, we celebrated Bubble Wrap Appreciation Day! During Arctic week, we placed them on the floor and did the Penguin Dance! We to use our listening ears and followed directions to the song!

Soccer Shots taught us virtually for our soccer lessons! We kicked down cones with our feet, picked them up with our feet and had fun scoring goals! We learned all of the rules. The children cannot wait for the spring so we can go outside and play soccer with our coaches!
